MANAGING YOUR CROSS CONNECTION PROGRAM

VEPO
CROSSCONNEX

Properly managing your cross connection program is essential to the safety of your customers! VEPO CrossConnex has developed a cloud based software and mobile application to manage, analyze, and report on all backflow devices in your system, bringing your utility into full compliance with state and local governments. Its NO CHARGE and simple to implement!

✅ Complete Record Keeping
- Capture all account info and test results for all accounts with devices
- Create and archive Department of Health (DOH) 1013 forms electronically
- Track maintenance and repairs made to devices
- Total # of backflow preventers & tests completed on each
- Track annual test dates

✅ Notifications
- Notify customers of appointments through email and text
- Notifications at 30 and 15 days from test due date reducing utility costs
- Custom notifications when necessary

✅ Dashboards and Reports
- Accounts completed, not completed, past due, etc.
- History of jobs by location and type
- Test locations, scheduled tests, repairs made
- Time tracking
- Account numbers, locations, payments
- Annual, Semi-annual, or more frequent reporting

✅ Backflow Analytics
- Monitor models and failure rates
- Monitor test reports and testers to ensure proper tests conducted
- Predictive failures
- Track common areas of failure

Why Use VEPO CROSSCONNEX Software and Services?

Save Money
- **NO CHARGE for Utility**
- **No human capital required**

Save Time
- **File all paperwork with DOH**
- **No Utility contact with testers**
- **Testers schedule all appointments**

Full Compliance
- **Notify testers and customers when a test is due**
- **Prepared annual or semi-annual reports**
- **Track all assemblies**
- **Archive all reports**
